Introduction

Since 1937, the Tax Foundation has produced and published reliable information on government finances at the state, local and federal levels.

A year ago, with predictions of no recession or at worst a mild one, many state lawmakers relied on optimistic estimates of tax revenue for fiscal years 2009 and 2010 and made spending commitments that in retrospect appear imprudent. Now, unpleasantly surprised by the revenue shortfall, they are forced to take actions to balance their budgets.

While state lawmakers are looking at varying approaches to solve their state's fiscal problems, they should be cognizant that each change made to the tax code that will affect their state's competitive position in relation to other states regionally and nationally, for better or worse.

This is the sixth edition of the handbook, designed to give taxpayers and their lawmakers a simple guide to see how their state ranks on 38 different measures such as individual and corporate income tax rates, excise taxes, tax burdens and state spending.

These tables are compiled and maintained by Tax Foundation economists at www.taxfoundation.org. We hope these facts contribute to a healthy public debate.

A handwritten signature in black ink, appearing to read "Scott A. Hodge". The signature is fluid and cursive, with a long, sweeping underline that extends to the left.

Scott A. Hodge
President

Note: See table 38 for average people per household by state.

Source: *Tax Foundation Special Report*, No. 163, "State-Local Tax Burdens Dip as Income Growth Outpaces Tax Growth." The income measure used adds the following to Bureau of Economic Analysis's personal income measure: capital gains realizations, pension and life insurance distributions, corporate income taxes paid, and taxes on production and imports less subsidies. It subtracts from personal income the fungible portion of Medicare and Medicaid, estimated Medicare benefits that are provided via supplementary contributions, initial contributions to pension income and life insurance from employers, and the annual investment income of life insurance carriers and pensions that is included in personal income.

Tex.		None			

(a) Applies to single taxpayers and married people filing separately. Some states increase bracket widths for joint filers. See note (b).

(b) Some states effectively double the bracket widths for joint filers (AL, AZ, CT, HI, ID, KS, LA, ME, NE, NY, OR). CA doubles all bracket widths except the \$1,000,000 bracket. Some states increase, but don't double, all or some bracket widths for joint filers (GA, MN, NM, NC, ND, OK, RI, VT, WI). MD decreases some of its bracket widths and increases others. NJ adds a 2.45% rate and doubles some bracket widths.

(c) Applies to interest and dividend income only.

(d) Rates apply to regular tax table. A special tax table is available for low income taxpayers which reduces their tax payments.

(e) Bracket levels adjusted for inflation each year.

(f) These states allow some or all of federal income tax paid to be deducted from state taxable income.

(g) Residents may choose between this rate schedule or a flat tax with no exemptions or deductions, levied at a rate of: 7% in 2008; 6.5% in 2009; 6% in 2010; and 5.5% in 2011 and beyond.

(h) Local rates are excluded; 14 states have county or city level income taxes. In each of these states the average rate for counties and large municipalities, weighted by total personal income within each jurisdiction, is: 0.19% in Ala.; 0.06% in Ark.; 0.16% in Del.; 1.16% in Ind.; 0.3% in Iowa.; 0.76% in Ky.; 2.98% in Md.; 0.44% in Mich.; 0.12% in Mo.; 0.09% in N.J.; 1.7% in N.Y.; 1.82% in Ohio; 0.36% in Ore.; and 1.25% in Pa (weighted local rates are from *Tax Foundation Background Paper*, No. 58, "2009 State Business Tax Climate Index").

(a) In addition to regular income taxes, many states impose other taxes on corporations such as gross receipts taxes and franchise taxes. Some states also impose an alternative minimum tax.

(b) Includes a 21.99% surtax on liability.

(c) Businesses with entire net income greater than \$100K pay 9.36% on all taxable income, companies with entire net income greater than \$50K and less than or equal to \$100K pay 7.8% on all taxable income, and companies with entire net income less than or equal to \$50K pay 6.76% on all taxable income. All rates include a 4% surtax on tax liability.

(d) These rates represent Ohio's corporate franchise tax (CFT). A tax on gross receipts, the commercial activity tax (CAT), was instituted in 2005. It will be phased in through 2010 while the CFT is phased out. From April 2008 through March 2009, the CAT rate is 0.208%. Beginning April 1, 2009, the CAT rate is fully phased in and equals 0.26%. For tax year 2009 companies owe 20% of CFT liability. For tax year 2010 and thereafter the CFT is fully phased out.

Mo.	4.225%	37	D.C.	5.75%	–
Mont.	None	–			

Note: State rates only. Some states permit counties or cities to levy local sales taxes; for a weighted average of local rates in each state see *Tax Foundation Background Paper*, No. 58, "2009 State Business Tax Climate Index."

(a) CA and VA include a 1% statewide local rate.

(b) Instead of a sales tax NM levies a gross receipts tax. The rate varies by municipality; and 5.375% is the minimum rate.

Note: The American Petroleum Institute (API) has developed a methodology for determining the average tax rate on a gallon of fuel. Rates may include any of the following: excise taxes, environmental fees, storage tank taxes, other fees or taxes, and general sales tax. In states where gasoline is subject to the general sales tax, or where the fuel tax is based on the average sale price, the average rate determined by API is sensitive to changes in the price of gasoline. States that fully or partially apply general sales taxes to gasoline: CA, CO, GA, IL, IN, MI, NY.

(a) Alaska's 8 cents per gallon tax is suspended from 9/1/08 through 8/31/09.

Source: American Petroleum Institute.
